

FS-V INVERTED Type Fluoropolymer Sintered Rupture Disks

...the best choice for highly corrosive, broad temperature range and low burst applications

ZOOK's new Fluoropolymer Sintered Graphite Rupture Disk offers enhanced features when compared to resin impregnated graphite disks. The Fluoropolymer coating is sintered at a high temperature onto a graphite blank. The durable coating seals the graphite material *enhancing the corrosive capability* and allows the disk to operate at sub-zero to elevated temperatures with *minimal* effect on the burst performance of the rupture disk.
